*NO LIMITS!!!*

*...And Still The Shortest Lead Time In The Industry™*

NO LIMITS!

TruStile Doors offers unlimited styles and options to fit all your door needs.

# Welcome to TruStile Doors, Inc.

In 1995, our company was founded to bring you a superior paintable door with unlimited design options. Our goal is to provide custom doors and products built to meet your specifications, schedule and budget. We promise to maintain impeccable workmanship, superior strength, durability and beauty that will last a lifetime. We back our goal with state-of-the-art manufacturing techniques combined with great attention to detail, exceptional customer service and our Limited Lifetime Warranty.

## Superior Materials

If you are painting your doors, choose one of our solid MDF doors.

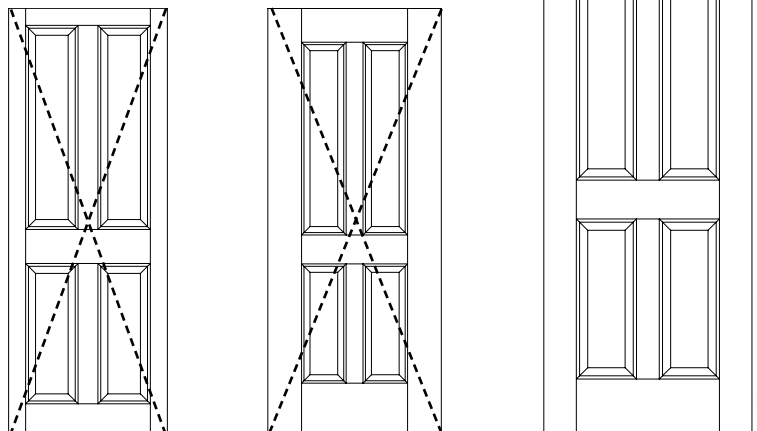

- MDF is more stable than wood.
- MDF is environmentally friendly.
- MDF won't shrink, expand or warp like wood.
- MDF panels won't shrink or crack.
- MDF doors cost less than wood doors.
- MDF provides a smoother surface for painting.

Available for both interior and exterior applications, our doors come in over 300 different designs to fit your exact needs.

## Superior Manufacturing

### Built To Any Size

At TruStile, we can make just about any size and design you can think of. You are not limited to "standard sizes," because for us, any size is standard. With our unique manufacturing process, we build each door, one at a time, to your specifications. Instead of cutting down a "standard" door to make it a custom size, we build each door parametrically, to your exact measurements. With a TruStile door, you won't pay more for a door that has been created to your unique size.

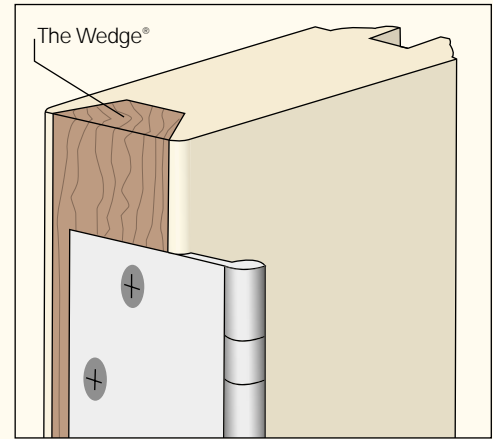

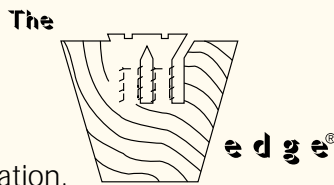

We don't trim from or add to the perimeter to make a door smaller or larger. We build our doors parametrically, the TruStile way.

## Construction

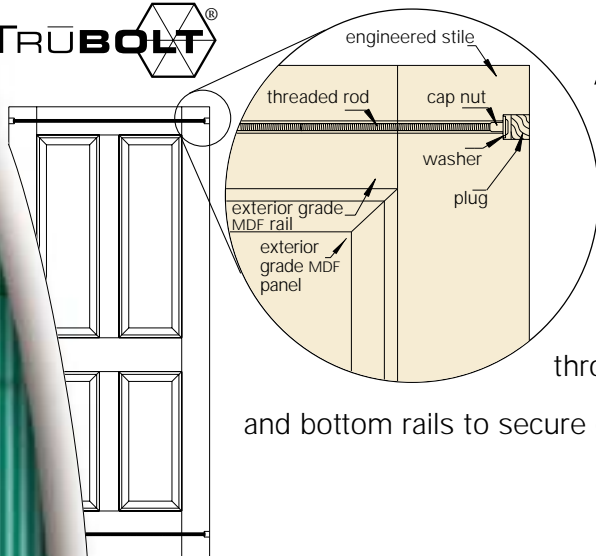

We use true stile and rail construction with The Wedge®, our hardwood edge system, in all of our MDF doors.

The Wedge® provides:

- Increased rigidity.
- Better screw holding.
- Quick and easy handling and installation.
- Easier chiseling for radius/square corner hardware.

## Exterior MDF Doors

All of our exterior MDF doors are built with exterior grade MDF and our exclusive TruBOLT® system. We use a through bolt in both top and bottom rails to secure each exterior door.

TS4140 Exterior

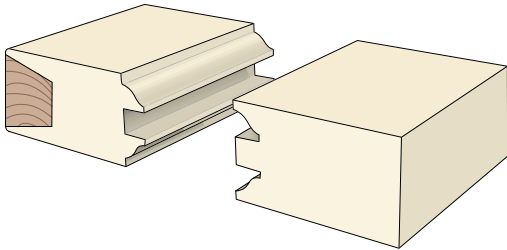

## Superior Product

- True stile & rail construction.
- Limitless design possibilities.
- Increased rigidity with The Wedge®.
- Superior sound deadening properties.
- Custom designs welcome.
- Excellent customer service.
- Available in any size up to 4' X 8'.
- More depth than routed or stamped doors.

## Superior Service

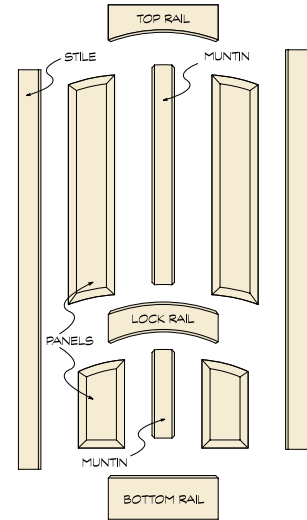

- Short Lead-Times: Ninety-five percent of all jobpacks are shipped in one week.
- Ready to assist Account Managers.

Our TS Series offers panel doors with as few as one panel or as many as nine. Choose a door with straight panels for a Craftsman style or curved panels for a more contemporary look. There are no limits to what your door can look like.

OG Cope and Stick

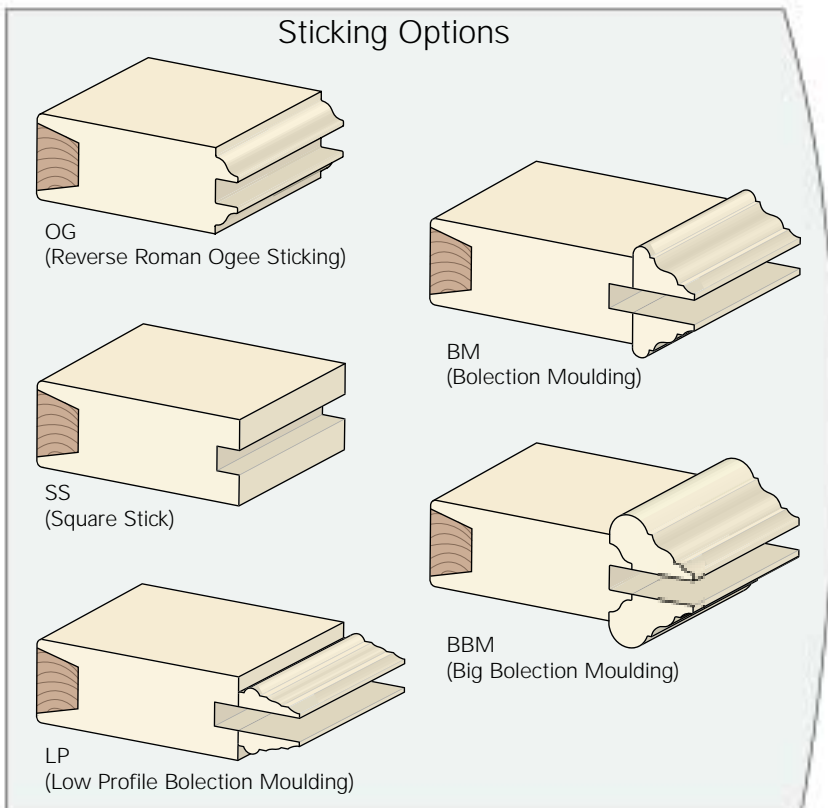

We manufacture our doors with true stile and rail construction giving you the option of rearranging components to create the style you're looking for.

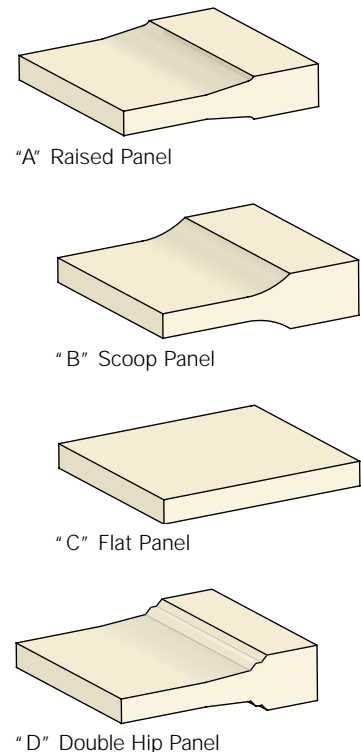

## Panel & Sticking Combinations

Our TS doors come standard with OG sticking and an "A" panel or you can choose a combination from our panel and sticking options illustrated below.

Mix and match any of the sticking and panel options below to customize your door.

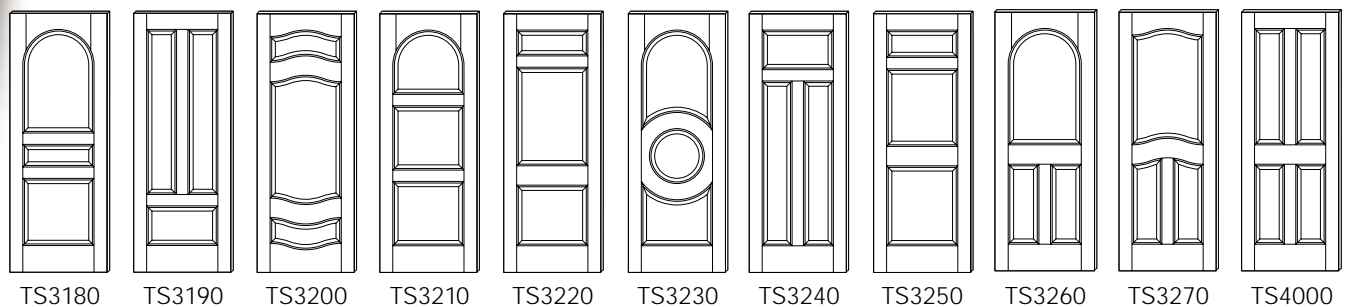

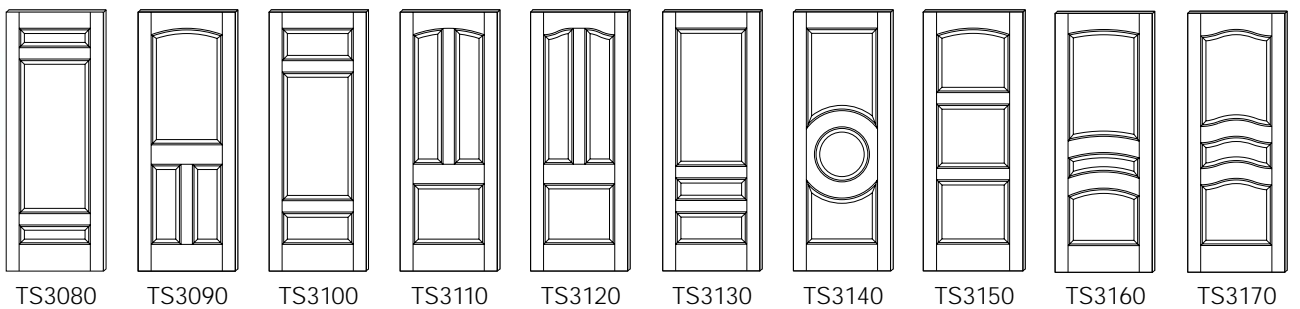

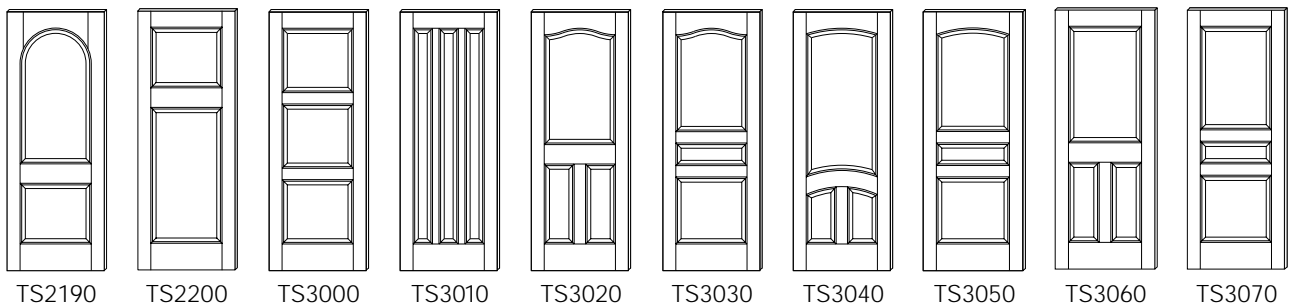

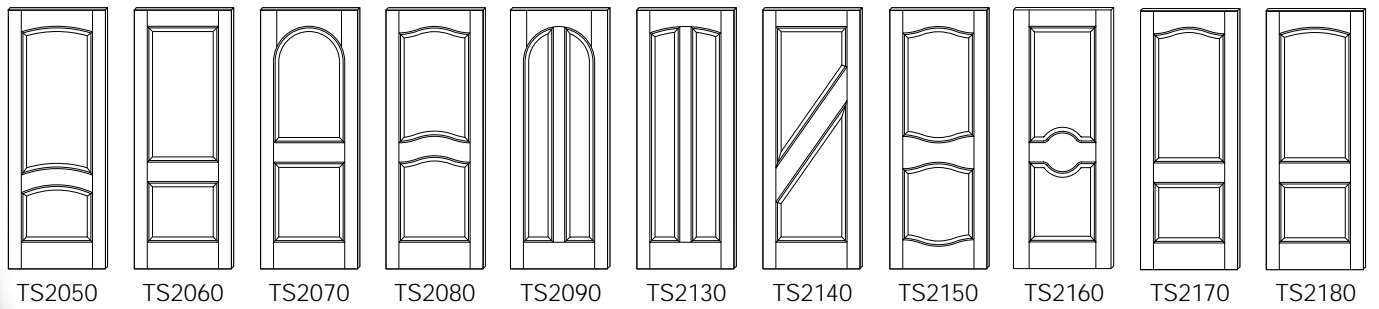

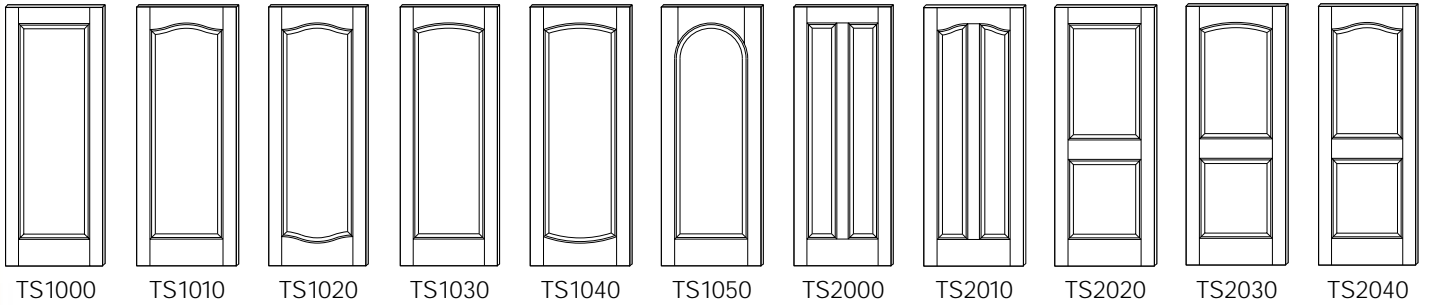

## Panel Options

# FL Series

Add a touch of elegance with one of our over 90 different glass doors. All of our French Doors come standard with 1/4" clear safety glass or are available with art glass, custom etched patterns and a variety of sticking options.

**NOTE:** Our French Doors come with a protective film to protect each lite. The film peels off easily after the door has been completely finished.

# PL Series

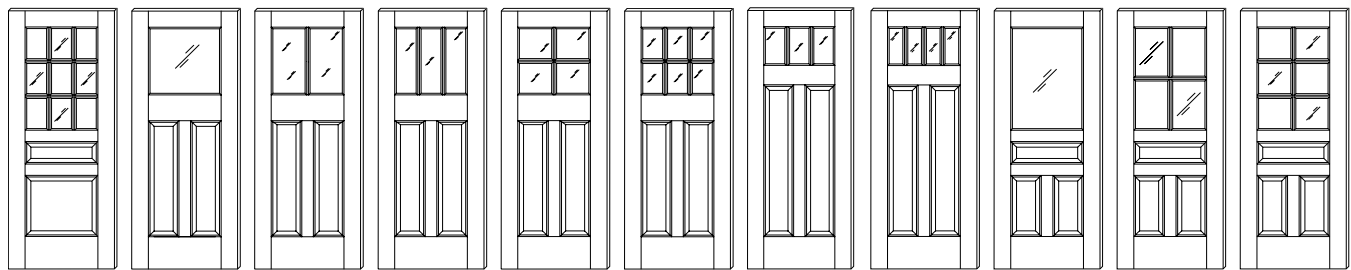

TruStile's PL Series offers over 40 new door designs. By combining our raised panels with french lites we have created unique door styles that are available for both interior and exterior applications. When ordering be sure to specify your panel and sticking combination, glass type and grade (interior or exterior).

# V-Groove Series

Take a step back with our rustic VG Series. Our square stick and v-groove doors give you the look and feel of tongue and groove plank doors.

When you order a 1-3/8" or 1-3/4" VG door you will receive your choice of our 1/2" or 3/4" C Panel.

# Tambour Series

For a more contemporary look try our Tambour Series. We combine traditional stile and rail construction with state-of-the-art CNC technology to bring you these sophisticated styles.

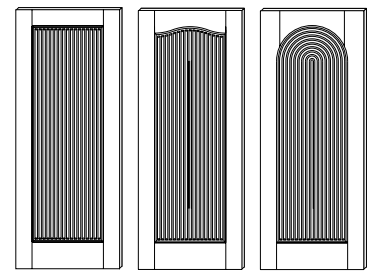

With each tambour door style, you have the choice of our half-round or bevel profiles shown below.

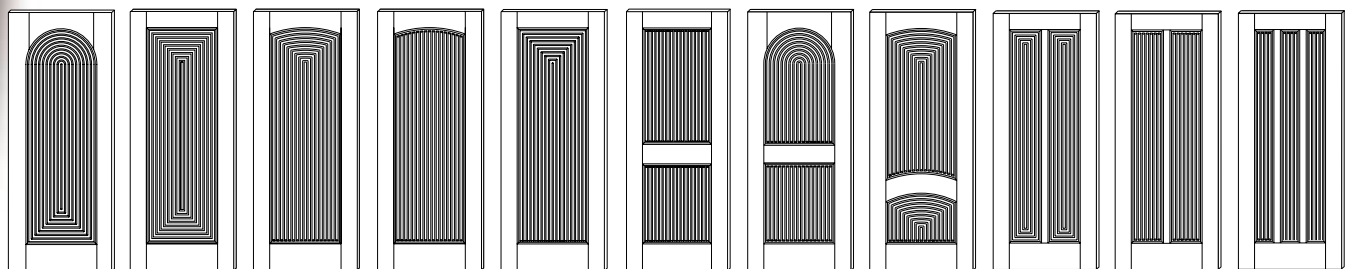

Half-Round Profile

Bevel Profile

Stile Widths (face dimensions): 5" on all tambours

Our Custom Design Series brings you an eclectic collection of old and new design styles. We combine "old world" craftsmanship with our cutting edge technology to create these custom looks. Whether it is a traditional stile and rail, french lite or sculpted design that you're looking for, you'll find it here.

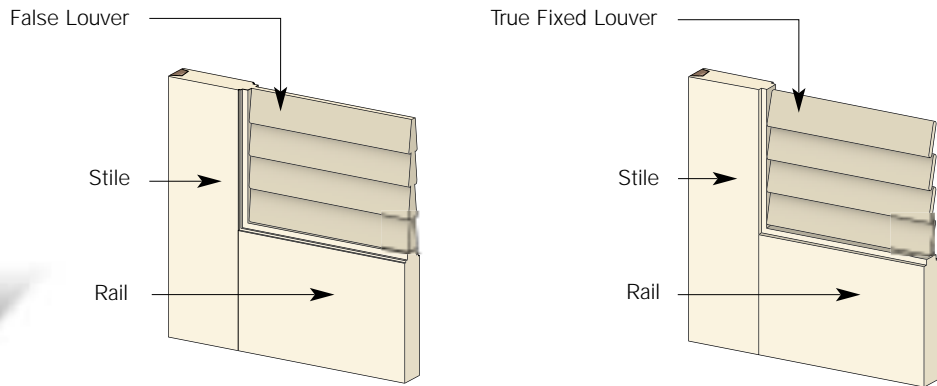

Ashley

## Louver Doors

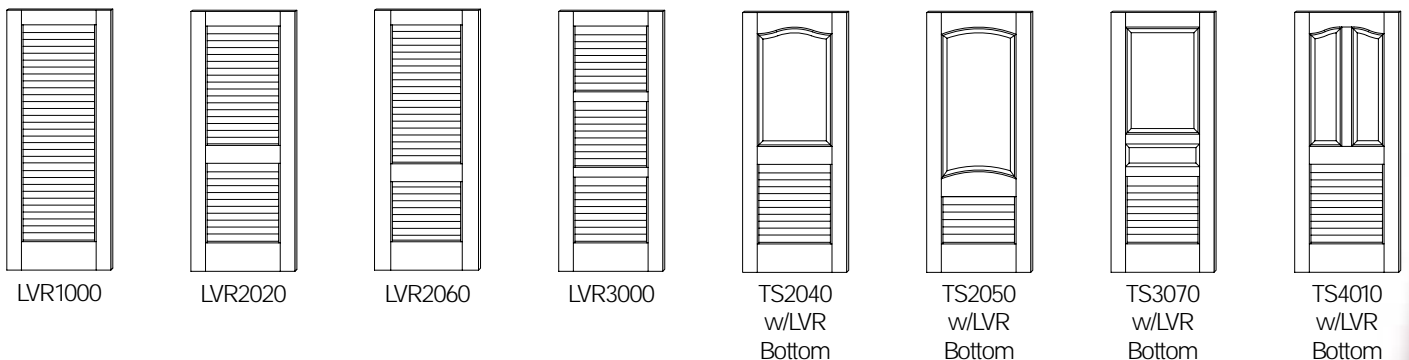

We offer plantation style louver doors in many of our door designs. You can also replace any square panel with louvers to create a custom look.

LVR2020 TS2030 With Louver Bottom

NOTE: Visible louver dimension: 2-1/8".

# Options

We understand that sometimes you need something different to create that special opening. That's why we say "no problem" to custom layouts.

## Common Arch Pairs

TS2070 CAP RT

As shown right, Common Arch Pairs (CAP) are available with Square Tops, Arch Tops (AT), Radius Tops (RT) and Elliptical Tops (ET).

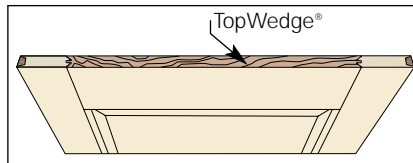

## Arch & Radius Tops

We can also provide a custom drop to fit your existing jambs or special needs.

## Pocket and Bypass Doors

Per your request we can include the TopWedge®, our hardwood Wedge®, in the top rail of your pocket or bypass doors. The TopWedge® provides easy hardware installation.

TS3040 Bypass Doors

TS4070 Pocket Doors

## Bifolds

TS8000 4 Leaf Bifold  
TS2020 W/LVR Top  
2 Leaf Bifold

## Transoms

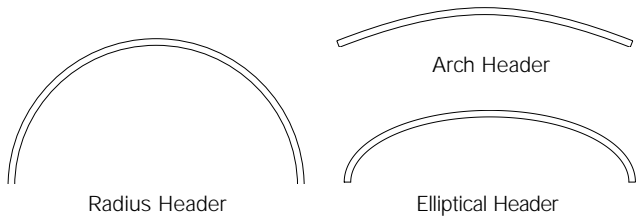

Create a panel or glass transom for your interior or exterior opening. Don't forget you can choose from our glass options shown on pages 8 - 9.

Custom Transom

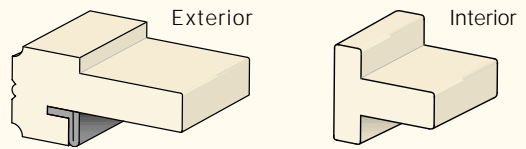

## Arch, Radius & Elliptical Jambs & Frames

We offer poplar headers separate or with legs. We can also provide doors with custom drops to fit existing jambs. Door stop is available. See your Account Manager for details.

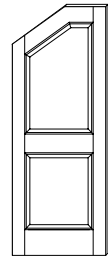

## T-Astragals

## Other Products

- Shutters
- Clip Corners
- Interior Door Stops
- Exterior Frames (includes weatherstrip)

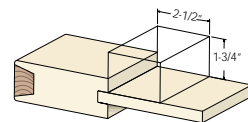

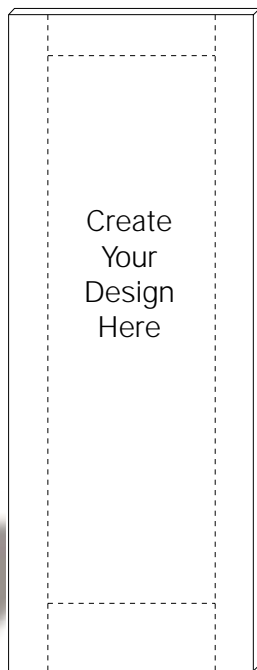

## Custom Program

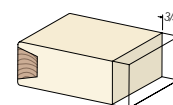

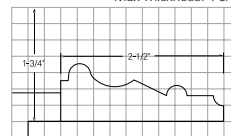

In addition to our standard panel, sticking and moulding options, we offer a unique custom profile program. This program is excellent for historical matches, remodels or simply for something unique. Please fax us your custom profile (parameters shown below) and we'll bring it to life with our CAD technology.

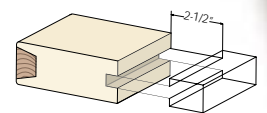

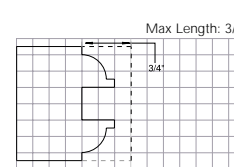

Custom 2 Panel

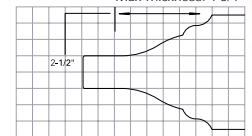

Sample Moulding  
Max Length: 2-1/2"  
Max Thickness: 1-3/4"

Sample Sticking  
Max Length: 3/4"

Sample Panel  
Max Length: 2-1/2"  
Max Thickness: 1-3/4"

## Historical Matches

TruStile's historical matches combine the beauty and elegance of old-world craftsmanship with the stability and strength of MDF. We offer all the options and accessories you'll need to finish any project. Send us a drawing, a photo, or even an image from a movie and our craftsmen will duplicate every feature with the crisp lines and superior detail of a TruStile MDF Door.

# Sound & Energy Ratings

ACOUSTICAL PERFORMANCE TESTING RESULTS			
<b>Note:</b> Higher STC ratings are available with select hardware. See your Account Manager for details.	STANDARD 1-3/8" DOOR	STANDARD 1-3/4" DOOR	20 MINUTE POSITIVE PRESSURE DOOR
STC RATING (sound transmission class)	31	33	45
DEFICIENCIES (number of deficiencies versus contour curve)	29	30	29
OITC RATING (outdoor/indoor transmission class)	28	30	38
Performance is based mainly on mass. As a comparison, a luan door has a 21 STC rating.			
THERMAL PERFORMANCE TESTING RESULTS			
U-FACTOR (thermal transmittance due to conduction)	.52	.4	N/A
Thermal transmittance (U) was determined in general accordance with ASTM C 1363-97, Standard Test Method the Thermal Performance of Building Assemblies by Means of Hot Box Apparatus.			

TruStile offers 20 through 90 minute 1-3/4" MDF Fire Doors manufactured with our exclusive FireWedge®. The FireWedge® includes an intumescent strip within our Wedge®, which expands and provides a smoke seal when heated. Our Fire Doors are available in hundreds of styles.

	POSITIVE PRESSURE SINGLES	POSITIVE PRESSURE PAIRS
RATING	20, 45, 60, 90	20, 45, 60
STYLES	TS, VG, CD, TMB	TS, VG, CD, TMB

## Recycled Content

Our doors have been tested and certified by SCS for recycled content. TruStile makes every effort to protect our environment.

## Warranty

All TruStile products are manufactured to the highest standards of quality and craftsmanship and backed by our Limited Lifetime Warranty against defects in workmanship and materials.
